

## » Front End Developer

We are looking for tech professionals specializing in front end development to join our team in Shanghai.

Our developers implement digital concepts for Apps, web applications, Mini Programs, and interactive experiences that include zero UI, gesture-control, augmented reality, sensors or other ways of interaction.

You have at least 3 years of experience in web front end development and you are familiar with standard frameworks, tools and collaboration processes.

And you are a curious mind, eager to accept challenges and to push your own limits.
